

THE 3.1M130*

OPTIMISED FOR LOW AND MEDIUM WIND SITES

The Senvion 3.XM Series

Our new 3MW+ series wind turbine generator with a hub height of 130m has been optimized for higher yields at medium – low wind site. With an operating temperature range of upto 49 °C, it can also be operated in tropical climates. The supply chain is localized. The 3.XM series is fully compliant with Indian grid code requirement

*Under type-testing. Commercially available only in India
