Operations and Maintenance (O&M) Services

Maximising Wind Turbine Performance for Optimal Results

FleetPro: Comprehensive (O&M) Services
Peak Performance – Peace of Mind

Senvion flexibly adapts the scope of its O&M service to meet its customers' needs. We provide standard solutions for a variety of customer needs, allowing you to fully take advantage of the Senvion service concept. With complete cost control, no cap on repairs, replacement of major technical components, and guarantee availability/output in line with potential energy production, our products are a simple, worry-free way to put your investment on a sure footing.
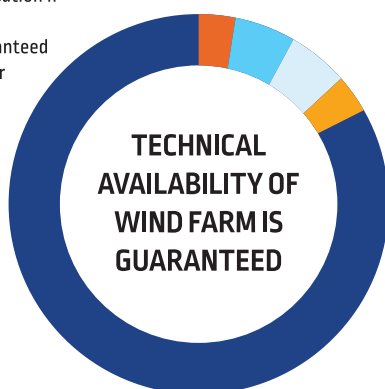

FleetPro - Time

The FleetPro-Time includes all maintenance and repair work to ensure that your wind farm is technically capable of operation, and it protects your investment by providing compensation if your turbines are operational for less than the guaranteed time of technical availability.
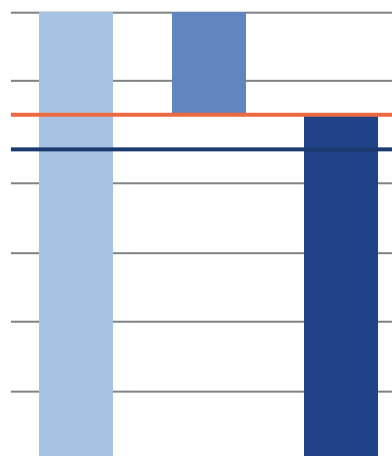

FleetPro - Energy *

The FleetPro-Energy includes all monitoring, maintenance, and repair services to minimise downtime and maximise performance, and it safeguards your investment by providing compensation if your wind farm's annual output falls below a guaranteed level in line with the potential guaranteed energy production.

The Senvion FleetPro availability guarantee

Customers receive compensation if availability falls below the guaranteed level, The guaranteed availability includes time for maintenance, retrofits and inspection

TECHNICAL AVAILABILITY OF WIND FARM IS GUARANTEED

- 🟧 Not Available
- 🟦 Maintenance
- 🟦 Retrofits & Inspection
- 🟧 Other
- 🟦 Operating Time

More Power to you!

This guarantee is based on the potential output. Senvion pays compensation if the actual achieved energy production falls below the potential guaranteed energy output level.

— ACHIEVED
— GUARANTEED

- 🟦 Potential Energy Production
- 🟦 Energy Loss due to service
- 🟦 Actual Energy Production

*This does not mean Generation
